Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date | 15 October 2022 |
|---------------|------------------------------|
| Team ID | PNT2022TMID24558 |
| Project Name | Vehicle Performance Analysis |
| Maximum Marks | 4 Marks |

Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task) |
|--------|-------------------------------|---|
| FR-1 | User Registration | Registration through Form |
| | | Registration through Gmail |
| | | |
| FR-2 | User Confirmation | Confirmation via Email |
| | | Confirmation via OTP |
| FR-3 | Display of services | It display various services that can be opted for particular vehicle. |
| FR-4 | Safety Measures | It tracks the vehicle location to avoid theft. |
| FR-5 | Performance Analysis | It analysis the performance of the vehicle before and |
| | | after service provided. |
| FR-6 | Bill payment mode | It provides various payment options. |

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description |
|--------|----------------------------|---|
| NFR-1 | Usability | The UX/UI will be user-friendly and will be highly responsive . |
| NFR-2 | Security | It provides a facility to track vehicles location that satisfies security. |
| NFR-3 | Reliability | The database of vehicles can be maintained for long time ensuring reliability. |
| NFR-4 | Performance | The application is programmed to efficiently work under circumstances like network congestion etc |
| NFR-5 | Availability | The application available for everyone at ease. The UX/UI experience should be understandable. |
| NFR-6 | Scalability | The application is designed in such a way that it can handle ,if any high traffic occurs. |
